

Anti-Fatigue Mats

Models Affected: All Operator Aboard Battery Extractors

Tech Tip
TT-950

Subject:

BHS equipment is manufactured with safety and comfort in mind. To aid in this, BHS offers anti-fatigue mats for all of our Operator Aboard Battery Extractors (BE).

Description:

Anti-fatigue mats help to reduce operator fatigue and increase comfort while standing on the machine during battery change outs. The mats also provide excellent traction to prevent slips and falls when climbing onto and off of the BE. The mats are made of an extra thick (5/8") PVC sponge material for maximum operator comfort.

Recommendation:

The anti-fatigue mats come standard on all new BE's and can be added to existing BE's in the field. Contact BHS or your local dealer for part number information for your specific model.
